Augmented Reality/Driving Simulator Study

We need volunteers for a study comparing vehicle displays and how they impact drivers. During the study, you will be asked to complete short tasks while driving in the simulator and wearing a heart rate monitor. During the study you will be asked to complete several short tasks and provide responses while driving in the simulator, taking no longer than 1.5 hours.

We need people that meet the following criteria:

- **No glasses** – either contacts or 20/20 vision
- Active driver with valid US driver’s license
- Drive a minimum of 3,000 miles per year
- Have experience using a cell phone while driving
- Aged 18+
- Not an employee of any vehicle manufacturers

Please be aware that there is a risk of induced motion sickness when using a driving simulator. If you are susceptible to motion sickness, migraines, epilepsy, dizziness or blurred vision, or are pregnant, then you should not volunteer.

You will receive **$10 compensation**.

If you are interested in participating, please contact Missie Smith at mis16@vt.edu.
