Ranjana Mehta, PhD, is an Assistant Professor for the Department of Environmental and Occupational Health at the Texas A&M University, graduate faculty for the Texas A&M Institute for Neuroscience, director of the NeuroErgonomics Laboratory, and co-director of the Texas A&M Ergonomics Center. She received her Ph.D. in Industrial & Systems Engineering from Virginia Tech.

Her research in the NeuroErgonomics Lab focus on brain-behavior relationships in three synergetic initiatives: 1) impact of psychological risk factors, such as stress, on neuromuscular function, 2) influence of the changing workforce characteristics, such as aging and obesity, on workplace injuries, and 3) applying brain-behavior models to address mobility limitations in clinical populations.
